

## **CORE IDEALS OF AMERICAN SOCIETY**

In which of our national document(s) (Declaration of Independence, Constitution, etc...) can you find the core ideal Justice?

As a society today, or throughout our history, explain how have we moved toward and/or away from that ideal.

**Today in society we have moved father away from justice. One way is because that when someone is suspected of being a terrorist, they are not being given a trial. Also, when people do a minor crime they are sentenced to life in jail or prison. But if someone does a major crime, they only get a few years or months. So all-in-all, I think that we have moved away from the justice democratic value.**
